Experience

Edward Jones

Remote

Full Stack Software Engineer II - US Client Holdings

Dec 2021 – Present

- Developing an internal REST API and user interface to update client accounts following corporate action events using Java, Spring, MongoDB, JavaScript, React, JUnit5 and Jest
- Supporting, maintaining, and enhancing a portfolio of core, distributed web services that each handle tens of millions requests per day and thousands of requests per minute
- Developed an internal REST API for producing entries (cash deposits/withdraws, distributions etc.) to client accounts in real time using Java, Spring, MongoDB, Kafka, and JUnit5
- Delivering code in development/UAT/production using Docker, Kubernetes, Helm, and Jenkins
- Working in a collaborative, Agile environment over two week sprint cycles using Jira

Invesco

Denver, CO

Bank Loan Services Analyst - Senior Loan Investments Team

Jun 2016 – Apr 2020

- Built automated financial models used daily by the team using Microsoft Excel and Visual Basic
- Created and maintained critical spreadsheets and reports for portfolio managers and traders

Education

Skill Distillery, Full Stack Software Development Program

Remote

Certificate of Completion

Graduated Sep 2021

- Learned the fundamentals of object oriented programming with Java
- Learned the basics of SQL, relational databases, DDL, DML and CRUD, and Object Relational Mapping
- Gained a strong understanding of REST APIs, HTTP, JSON, and the client/server, request/response cycle
- Developed full stack web applications using Java, MySQL, JavaScript, Angular, Spring, REST

Colorado State University, College of Business

Fort Collins, CO
